

VitalStim Provider Listing Terms and Conditions

VitalStim Therapy publishes a public list of facilities that are actively using the FDA cleared VitalStim system on its website to help patients and families locate clinicians who provide dysphagia treatment using VitalStim Therapy. As a responsibility to patients and physicians seeking this information, it is essential to assure that the clinicians listed on this list (VitalStim Provider Finder) are VitalStim certified and are using FDA cleared equipment and supplies in treatment.

In order to maintain accurate, up-to-date contact information for facilities and providers on the Provider Finder, a standard procedure for adding and maintaining facilities and/or clinicians to the Provider Finder is in place.

1. Providers must apply to be listed on the website. In order to apply, the following information needs to be provided:
 - a. VitalStim certification number
 - b. Serial number of VitalStim unit (handheld or Experia)
 - c. Verification of actively using FDA cleared VitalStim electrodes. This is confirmed by purchase of at least 2 boxes of 12 electrodes every 6 months.
 - d. Facility name, address, and contact information

2. In order to maintain current information, providers will be sent an email reminder to renew their listing every 12 months.

Effective date: July 1, 2009
